ABOUT

AIGP - IAPP

- **IAPP Artificial Intelligence Governance Professional** training by **TechEd Academy** builds a **foundational understanding** of **AI concepts** and real-world **applications**—including **machine learning** and other **AI systems**.
- The program offers an in-depth dive into **AI governance** and **risk management**, with focus on **interoperability**, **governance principles**, **infrastructure**, **project scoping**, and **system validation**.
- You'll also gain exposure to current **laws**, **standards**, and **emerging global regulations**, including **GDPR intersections** and the **EU AI Act**, along with key **risk management frameworks**.
- Finally, the course walks you through the complete **AI development life cycle**—from **planning** and **design** to **implementation** and ongoing governance.

Eligibility / prerequisites

- **No strict prerequisite certification**

EXAM PATTERN

AIGP - IAPP

- 100 questions total
 - 85 scored + 15 unscored
- Time: 2.75 hours

Passing score:

300+ on a 100–500 scaled score.

“The exam is presented in two sections. First 50 questions, break (optional) , then next 50. cannot return to review/change answers from the first section because **it locks**”

EXAM COST

AIGP - IAPP

Exam Fess

- Member price: USD 649
- Non-member price: USD 799

Annual maintenance fee:

- Initial 2 years CMF is included in Exam Fess

After 2 Years

- Members- covered as part of membership benefits
- Non-Members - USD 250 upon recertification

COURSE CURRICULUM

AIGP - IAPP V2.0.1

- **Domain 1 — Understanding the foundations of AI governance (≈ 16%–20%)**
 - Understand what AI is and why it needs governance.
 - Establish and communicate organizational expectations for AI governance.
 - Establish policies and procedures to apply throughout the AI life cycle
- **Domain 2: Understanding how laws, standards and frameworks apply to AI**
 - Understand how existing data privacy laws apply to AI
 - Understand how other types of existing laws apply to AI
 - Understand the main elements of AI-specific laws.
 - Understand the main industry standards and tools that apply to AI

COURSE CURRICULUM

AIGP - IAPP V2.0.1

- **Domain 3 — Understanding how to govern AI development ($\approx 21\%$ – 25%)**
 - Govern the designing and building of the AI system.
 - Govern the collection and use of data in training and testing the AI model and system.
 - Govern the release, monitoring and maintenance of the AI system.
- **Domain 4 — Understanding how to govern AI deployment and use ($\approx 21\%$ – 25%)**
 - Evaluate key factors and risks relevant to the decision to deploy the AI system.
 - Perform key activities to assess the AI system.
 - Govern the deployment and use of the AI system.

TARGET AUDIENCE

AIGP

- **Consultants** & advisors supporting client AI governance implementations
- **Security professionals** involved in AI risk and system assurance
- **AI product, program, and project** managers who need governance-by-design across the AI lifecycle
- Data/AI leaders responsible for risk, oversight, and accountability
- Privacy, GRC, Risk & Compliance professionals
- **Legal & regulatory teams** handling AI laws, contracts, and compliance obligations
- Policy & ethics professionals focused on Responsible AI and trustworthy AI practices
