# About the Course

- ✓ **+40-Hour LIVE Instructor-led Training**
- ✓ **Access to Recorded Sessions**
- ✓ **Full 8-Domain Exam Practice**
- ✓ **Post Training Support**
- ✓ **Certified & Experienced Instructors**

# Course Objectives

- ✓ Build a strong foundation in confidentiality, integrity, availability (**CIA triad**), governance, compliance, and risk management.
- ✓ Learn how to identify, assess, and mitigate **security risks** aligned with overarching business objectives.
- ✓ Gain expertise in creating secure **IT infrastructures**, including robust networks, systems, and applications.
- ✓ Understand how to comprehensively apply **technical and administrative controls** to protect organizational assets.
- ✓ Develop critical skills in **incident response**, ongoing monitoring, accurate logging, and disaster recovery.
- ✓ Understand modern **secure coding practices** and the integration of software lifecycle security concepts.
- ✓ Learn and master **global standards, laws**, and foundational ethical practices within the cybersecurity field.
- ✓ Build the strategic capability to **lead security teams** and strictly align security strategy with business goals.

# Target Audience

- ✓ **Information Security Professionals**
- ✓ **Security Consultants & Analysts**
- ✓ **IT Managers & Directors**
- ✓ **Security Architects & Engineers**
- ✓ **Network Architects & Administrators**
- ✓ **Chief Information Security Officers (CISOs) / Senior Leaders**
- ✓ **Auditors & Compliance Professionals**
- ✓ **Professionals Transitioning into Cybersecurity**

# Exam Information

|                               |                                                                                                           |
|-------------------------------|-----------------------------------------------------------------------------------------------------------|
| <b>Exam Name</b>              | CISSP (Computerized Adaptive Testing – CAT)                                                               |
| <b>Launch Date</b>            | Effective April 15, 2024 (current CAT format update)                                                      |
| <b>Exam Duration</b>          | Up to 3 Hours                                                                                             |
| <b>Number of Questions</b>    | 100–150 items (adaptive format)                                                                           |
| <b>Passing Score</b>          | 700 out of 1000 points                                                                                    |
| <b>Exam Language</b>          | English                                                                                                   |
| <b>Testing Centers</b>        | Pearson VUE Authorized Testing Centers (including ISC2-authorized PVT/PPC locations)                      |
| <b>Exam Type</b>              | Adaptive – question difficulty adjusts based on your performance                                          |
| <b>Result</b>                 | Immediate provisional result after completion                                                             |
| <b>Registration</b>           | Through Pearson VUE (official ISC2 exam partner)                                                          |
| <b>Experience Requirement</b> | Minimum 5 years of work experience in at least 2 of the 8 CISSP domains (or 4 years with approved waiver) |
| <b>Validity</b>               | Certification valid for 3 years (requires CPE credits for renewal)                                        |
